

VIKAS DUBEY

Lead Java Developer

 Mumbai, India |  +91 86938 19303 |  vikasdubeyyy@gmail.com |  LinkedIn

Professional Summary

Lead Java Developer with over 11 years of experience. Building scalable systems in the banking and finance sector. Skilled in backend development, performance tuning, and designing tools that simplify daily workflows. I enjoy writing clean, maintainable code, mentoring teammates, and exploring new technologies like GenAI to improve how we build software.

Technical Skills

Languages: Java, Python, SQL, Go

Frameworks: Spring, Spring Boot, gRPC

Databases: Oracle, Sybase, MySQL

Messaging Systems: EMS, Solace

DevOps: Jenkins, Docker, Kubernetes

Tools: Git, JIRA, Confluence

Architecture: Event-Driven, Microservices, REST APIs

Monitoring & Platforms: ELK Stack, Grafana, Android SDK, Web Development

AI & Innovation: Amazon Bedrock, DeepRacer, Devin AI

Professional Experience

Nomura, Mumbai, India

Lead Java Developer • May 2021 – Present

- Working on the design and development of a new FX trading platform for global markets.
- Leading a 4-member team and helping shape the architecture and technical direction of the project.
- Building internal tools that make daily development tasks faster and easier.
- Created frameworks to run stress tests and benchmark system performance.
- Improved system speed and efficiency by cleaning up legacy code and tuning SQL queries.
- Writing clear, detailed technical documentation using Confluence.
- Taking the lead on software upgrades and helping modernize legacy parts of the platform.
- Managing deployments and looking after the full release cycle.
- Mentoring teammates, reviewing code, and encouraging good development practices.
- Actively participating in GenAI contests and testing out new AI tools for real-world use.
- Handling Level 3 production support and making sure systems stay stable and responsive.

Aveksha Technologies, Mumbai, India

Senior Java Developer • Jan 2019 – Apr 2021

- Worked on improving the performance of high-load banking systems by fine-tuning backend architecture.
- Built custom monitoring tools using Java and Go to keep track of system health and behaviour.
- Closely collaborated with infra and QA teams to make sure systems stayed reliable even under heavy traffic.

Capgemini, Mumbai, India

Senior Java Developer – Volvo Cars • Oct 2017 – Jan 2019

- Took ownership of backend module development and worked closely with the UI team for smooth integration.
- Helped junior devs grow by mentoring them, doing regular code reviews, and encouraging clean coding habits.

4 Square Technology, Mumbai, India

Android & Java Developer • May 2014 – Oct 2017

- Built Android apps and Java-based backend systems for enterprise clients in finance and logistics.
- Handled the full development cycle — from gathering requirements to delivering the final product.

Projects & Highlights

1. FX Trade Migration Tool

A backend tool to move FX trades from London to Singapore for compliance and cost-saving benefits.

- Designed and built a Java-based solution to extract, transform, and rebook FX trades across jurisdictions.
- Improved migration performance by **70%**, allowing trades to complete within active trading hours.
- Enabled Nomura to realize **\$48M** in revenue by aligning trade activity with regulatory and strategic goals.

2. New FX Trade Platform – UI Modernization

A modernization effort to transition the legacy trading UI and logic to a more modular, scalable architecture.

- Replaced an old C++ desktop UI with a lightweight, React-based web client.
- Shifted business logic into backend Java microservices, enabling more flexible and efficient system design.
- Improved user experience, simplified maintainability, and sped up release cycles significantly.

Key Achievements

- Received 3× "Star Awards" at Nomura for:
 - Restoring lost production database and live trades after a critical outage
 - Delivering a high-stakes FX trade migration project with zero impact across IT systems
 - Regular CSR participation as a platelet donor to help cancer patients

Education

Master of Science in Computer Science

Ramniranjan Jhunjunwala College, Mumbai — 2016.
